

Eurasian Milfoil Management Report

Brant Lake

September 26 – September 29, 2016

Aquatic Invasive Management, LLC.

AIM

Work Summary for the period 9/26/2016 – 9/29/2016

Crew Leaders: Blayne Colvin

Location: Brant Lake

Monday 9/26/2016 - (Map - •)

Location: Sites 61, 34 (AIM Site Inventory)
Observations: Site 61, S - Dense, multi-stem Eurasian Milfoil plants, 5'-12' tall. Total EWM - 10 bags.
Site 34 – Dense, multi-stem Eurasian Milfoil plants, 4'-10' tall. Total EWM - 10 bags.
Both sites, plants found growing on rock piles.
Harvest Data: 20 bags Eurasian Milfoil

Tuesday 9/27/2016 - (Map - •)

Location: Site 34
Observations: Working same area as previous day.
Harvest Data: 33 bags Eurasian Milfoil

Wednesday 9/28/2016 - (Map - •)

Location: Site 34
Observations: Working same area as previous day. Cleared densest area of EWM patch.
Harvest Data: 27 bags Eurasian Milfoil

Thursday 9/29/2016 - (Map - •)

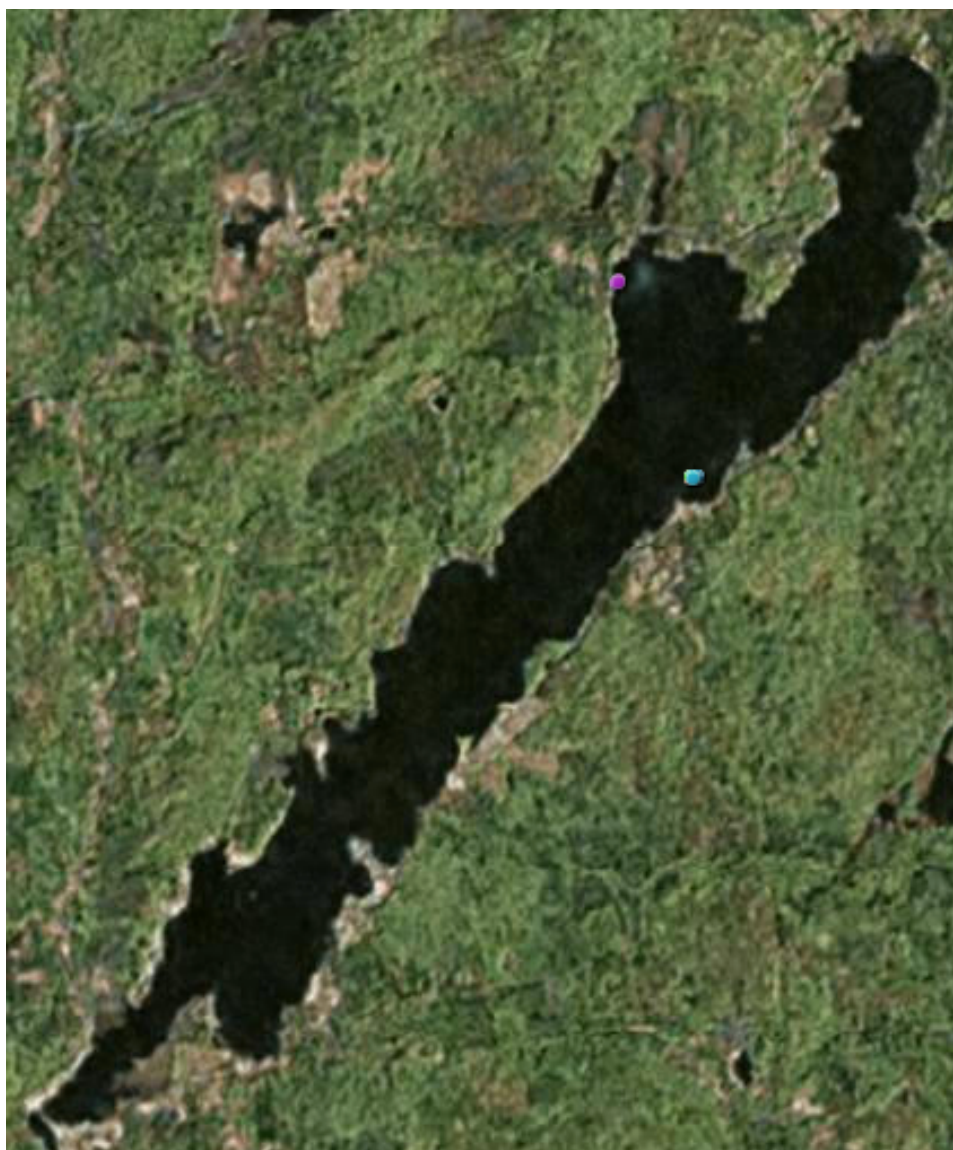

Location: Site 34
Observations: Working perimeter of previous day's harvest area. Mostly multi-stem, Eurasian Milfoil plants, 3'-4' tall, sporadic growth.
Harvest Data: 9 bags Eurasian Milfoil

Summary: Considering the fact that a new dense patch was found along with sites that may hold more old growth it is recommended, if possible, to harvest one more week before we close out the season. Both patches harvested this week were clear and should be checked first thing next year as a precaution.

89 bags of Eurasian Milfoil were harvested this week for a total of 2,025 lbs.
